

Data Exchange

Integrate Your Systems Seamlessly with the Epicor Advanced MES Data Exchange Module

Integrate Your Systems Seamlessly

The Data Exchange module is a step-by-step import and export wizard for your Epicor Advanced MES system. It provides a fast, easy way to transfer data so you avoid manual data entry and help ensure data integrity. The Data Exchange module launches directly from the Advanced MES home screen and presents options for the data you want to capture. With each click, you control which data, how much data, and file format. It's easy enough for operations to export data on-the-fly, and also handles the complex import and export demands of data administrators and IT professionals.

Data In or Data Out - Always Accurate

Import master data from the ERP system? That's easy. What about sending production data back to the MRP or ERP system? It helps with that, too. The Data Exchange module eliminates manual input, so you save time and help avoid costly data errors. Accurate production data from the MES system for your business systems means a business that runs more smoothly. The shop also benefits when master data comes in clean and accurate.

Advanced MES

Benefits

Easy data import and export for Advanced MES

Consistent accurate data between applications

Avoid double data entry

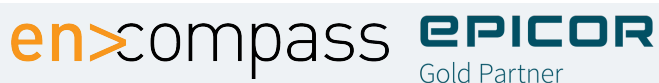

Feed ERP, MRP and other business systems

Easy-to-use wizard guides the user

You Control Where Data Goes

As an import/export tool for the Advanced MES system, the Data Exchange module makes the job easier for your systems professionals. With flat files in hand from the MES system, they control where the data goes and how it's handled without having to worry about costly, time-consuming data translation.

Encompass Solutions is a business and software consulting firm that specializes in ERP systems, EDI, and Managed Services support for Manufacturers. Serving small and medium-sized businesses since 2001, Encompass has helped modernize operations and automate processes for hundreds of customers across the globe. Whether undertaking full-scale implementation, integration, and renovation of existing systems, Encompass provides a specialized approach to every client's needs. By identifying customer requirements and addressing them with the right solutions, we ensure our clients are equipped to match the pace of Industry.
