

Epicor Mfg Wireless Warehouse

Prepare your warehouse and shop floor operations for a new era of productivity with the industry leading innovation of Epicor Mfg Wireless Warehouse (EMWW) – formally known as Epicor Mobile Warehouse – powered by Biscit.

Fast and Accurate Scanning

Epicor Mfg Wireless Warehouse is the next generation handheld application, which is completely integrated with Kinetic. It offers a modern, intuitive user interface for warehouse and distribution functions.

Epicor Mfg Wireless Warehouse optimizes workflow for fast and accurate scanning, improves time to process transactions, increases accuracy, and reduces errors. It is compatible with the latest scanning devices running on Android® 6.0.1 or higher from Honeywell® and Zebra®. Simply download the application from the Google Play™ store into your device and start using it with minimal set up.

Pre-requisites

Epicor® ERP 10.2.400 or higher

Epicor Mfg Wireless Warehouse application provides a modern and intuitive user experience

Features

Receiving

Provides complete functionality to process an inbound container or purchase order, as well as intercompany and transfer order receipts. It provides users with effective and efficient serial and lot processing and multiple UOM scanning. Users can search for all open PO's for a part by scanning parts barcode.

Kinetic

Benefits

Modern and intuitive application

Complex sort and filter options

Part level validation

Bin level validation

Configurable scan validation

Shortcut to favorites

Automated work flows triggered by scan events

Paperless: Capture signatures and photographic proof of delivery

Delivery Route Optimization and Navigation with Google Maps™ integration

Process an inbound container or purchase order, as well as intercompany and transfer order receipts

Manage all your PCID needs including build, split and merging

Material management

Provides core warehousing functions allowing users to initiate adjustments and movements from the warehouse floor. Offers an increased efficiency with cycle counts and stock takes. Enables efficient entry with automated workflows triggered by scan events.

Material queue

Users can efficiently pick items assigned to their queue, grab items from the available queue, or return items back to the queue. Users can select an outbound order and select all material queue transactions related to the order, to the users' queue. Advanced sort and filter functionality allows users to save to a named query and dynamically add to the sub menu. Unpicking sales or transfer orders functionality is also included.

Shipping

Scan pick validation option included. Process outbound shipments direct from the device. Functions include creating Master Packs and standard Pick Lists for customers not licensed for Advanced Material Management (AMM).

Trackers

Trackers help the shop/warehouse users in completing their daily routine.

Powered by BISCIT

Since its establishment in 2002, BISCIT has formed a strong relationship with Epicor and as a certified Partner are proud experts in delivering successful Kinetic projects Australia wide and overseas. BISCIT specializes in Kinetic services to deliver flexible, comprehensive and value-driven business solutions.
